### **DETAILED ACTION**

1.0 The application of De Benedittis et. al. entitled "METHOD AND DEVICE FOR THE ANTENNA SELECTION IN A DIGITAL TELECOMMUNICAITON SYSTEM" which was filed on 3/15/2001 and claims priority based upon Italy MI 98 S 001674 dated 07/21/1998 was examined. Claims 1-10 are pending.

## Claim Rejections - 35 USC § 112

2.0 The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected relative to 112/2<sup>nd</sup> paragraph because the metes and bounds of the claims cannot be assessed.

Referring to Claim 1, the applicant uses "and/or" on Page 11 lines 12-14. What is meant by "and/or"? The applicant uses "in the affirmative case, verifying if the power variability between different" on Pg 11 line 25. What is meant by "affirmative case" of what?

The applicant usage of "f) if the verification according to the previous step e) has a negative result, stating the selection of the antenna/s applying a criterion which takes into consideration the comparison according to the previous step e". This step is confusing. What is meant by this step.

The applicant uses "i.e. means adapted to ....." per Pg 11 line 8. What is meant by "i.e. means adapted to"?

Referring to Claim 6, What is meant by "the negative case"?

Referring to Claim 7, What is meant by "bearer handover"?

Referring to Claim 10, What is meant by "adapted to" per Pg 13 line 5? What is meant by "and/or" per Pg 13 lines 9-11.

Referring to Claim 10, It is unclear whether the applicant is claiming a device or a method.

## Claim Objections

3.0 Claim 10 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the

claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

### **Conclusion**

4.0 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Morris; U.S. Patent No.: 6,032,033 dated 2/29/2000 in which he discloses method for selecting an antenna by utilizing a correlator to detect a sync signal and subsequently measuring RSSI for two different antennas wherein the values of RSSI are stored in a table and subsequently a decision is made based upon a criteria for antenna selection. The difference between this reference and the applicant is that the applicant makes RSSI measurements when correlation has failed whereas the prior art makes RSSI measurements after the correlator successfully determines the presence of a sync signal.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W Wilson whose telephone number is (703) 305-4703. The examiner can normally be reached on M-F (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Douglas Olms can be reached on (703) 305-4703. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9314 for regular communications and (703) 872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
